NITISH

MERN STACK DEVELOPER

ABOUT ME

As a dedicated MERN stack developer, I am passionate about building dynamic and user-centric web applications. With a solid foundation in frontend technologies like HTML, CSS, JavaScript, and React, I strive to create seamless and intuitive interfaces. Additionally, I am gaining experience in backend development using Node.js, Express.js, and MongoDB, which allows me to contribute to full-stack projects.

WORK EXPERIENCE

● Deepnap Softech

2024 - 2025

- Role: MERN Stack Developer
- Duration: 3 months
- Worked on developing full-stack web applications, improving user experiences, and implementing backend functionalities using the MERN stack.

EDUCATION
